These critical thinking games aren't easy...but they are FUN!  
Use your logic and reasoning to solve the puzzles and find success.  
Click the picture to visit each website. Good Luck!!

### Jigsaw Planet

Can you put together a virtual jigsaw puzzle on the electromagnetic spectrum? Time yourself on this puzzle and others!

**Sliding Blocks** is a geometry-based game that requires you to anticipate the correct moves and release the red block. Puzzles get more challenging as you succeed. If you like handheld slide puzzles, you'll enjoy this online version.

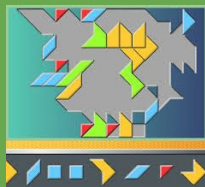

**Count the Cube** sounds much easier than it is. Levels are timed and increase in difficulty as you advance. Watch out for tricky stacked layers and see if you can beat the clock!

### Rainbow Mechanic

Can you devise a way to direct a beam of sunlight to the prism? Correctly place and use mirrors to change the direction of the light and watch your prism light up with a rainbow of success.

### Shape Inlay Puzzles

Ever been successful with Tangrams? These shape puzzles are tangrams bumped up to the next level. Fit as many shapes correctly in the puzzle as you can; points accumulate and time goes by quickly!

### Color Cube

Remember the Rubik's Cube? Think you can solve a virtual version? 6 Sides with 6 different colors...can you make all sides the same color by rotating rows and columns?
